

Donor Conception and Surrogacy Network

Supporting New Zealanders to build whanau through donor conception and surrogacy

Fertility New Zealand's Donor Conception and Surrogacy Network is a hub for peer support, resources, events and guidance.

We provide a confidential and positive forum to New Zealanders who are considering building a family through donor conception or surrogacy, are in the process, or already have children via these means.

We offer guidance and discussion from both parents and professionals across a variety of situations and family forms. Donors and surrogates are also very welcome (note that this is not a forum to advertise or donor match).
